

Static Portfolios

Unlike the Year of Enrollment Portfolios, Static Portfolios are not automatically reallocated to more conservative investments as the Beneficiary ages. Instead, Static Portfolio investments remain fixed, subject to periodic rebalancing back to the Portfolio guidelines and to any change by the Committee in the Portfolio investment guidelines.

If you choose to invest in Static Portfolios that invest in Underlying Funds with a significant weighting in stocks, such as the Growth Portfolio and the Moderate Growth Portfolio, you should consider moving your assets to the more conservative Static Portfolios that invest more heavily in bond Funds and/or the Money Market Fund as your Beneficiary approaches college age. Please note that there are limitations on your ability to move assets from one Portfolio to another. (Please see Maintaining My Account in the Program Details Booklet)

The Static Portfolios consist of the following seven (7) Portfolios, each of which invest in multiple Underlying Funds as shown in the table on the next page.

Static Asset Class Allocations

Current Static Portfolio Underlying Fund Allocations (by percent)

Fund	Cash Preservation Portfolio	Income Portfolio	Income & Growth Portfolio	Balanced Portfolio	Conservative Growth Portfolio	Moderate Growth Portfolio	Growth Portfolio

Static Portfolio Profiles

The following profiles highlight the investment objective, strategy, and a summary of the main risks of each Portfolio. The Portfolios in DreamAhead are more likely to meet their goals if each Underlying Fund in which each Portfolio invests achieves its stated investment objectives.

As with any investment, your investment in the Portfolios could lose money or the Portfolios' performance could trail that of other investments. Each Portfolio has a different level of risk. Each Underlying Investment's current prospectus and statement of additional information contains information not summarized here and identifies additional risks that are not discussed below.

The Funds comprising a Portfolio and/or percentages of each Fund included in a Portfolio may change at any time without notice. The sponsors of the Underlying Funds have no legal obligation to provide financial support for their Funds, and you should not expect that a sponsor will provide financial support to a Fund at any time. You may wish to speak to an investment advisor to understand the specific risks associated with each Portfolio. A discussion of the risk factors relating to each Portfolio and Underlying Funds can be found in the Program Details Booklet.

Cash Preservation Portfolio

Objective:

This Portfolio seeks to provide maximum safety and liquidity, and to provide a low rate of return consistent with limited risk. The Cash Preservation Portfolio is designed to preserve capital and to provide liquidity to meet typical immediate and short-term needs. The Portfolio is invested exclusively in high-quality, short-term money market instruments that aim to preserve capital, maintain liquidity and produce a competitive yield.

Strategy:

The Portfolio is exclusively invested in the Vanguard Federal Money Market Fund. Under normal conditions, the Fund invests its assets exclusively in:

- debt securities issued or guaranteed by the U.S. government, or by U.S. government agencies or instrumentalities or Government-Sponsored Enterprises (GSEs), and
- repurchase agreements fully collateralized by U.S. Treasury and U.S. government securities.

Risks:

The Portfolio primarily may be subject to the following risks:

- Interest Rate Risk; Credit Risk; General Market Risk; Mortgage-Related Securities Risk; Government Securities Risk; When-Issued, Delayed Settlement and Forward Commitment Transactions Risk; Transactions Risk; Floating and Variable Rate Securities Risk; Net Asset Value Risk; Repurchase Agreement Risk; Risk Associated with the Fund Holding Cash; Interfund Lending Risk; Prepayment Risk; and State and Local Taxation Risk.

Income Portfolio

Objective:

The Income Portfolio seeks to provide investors limited capital appreciation with minimal risk to principal. The Portfolio is designed for investors with a very low tolerance for short-term market fluctuations who want low risk to principal and have a high desire for current income with limited capital appreciation. The Portfolio investments include a mix of fixed income investments with a significant cash (Money Market Fund) position.

Strategy:

The Portfolio currently invests in the following Funds: Fidelity® U.S. Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Vanguard Long-Term Treasury Index Fund Institutional Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Government Bond Index Fund Institutional Shares and Vanguard Federal Money Market Fund.

The Portfolio's main goal is to provide income by investing in broadly diversified fixed income Funds and the Money Market Fund. The Portfolio's Underlying Funds primarily include a wide spectrum of public, investment-grade, taxable, fixed income securities issued in the U.S. to provide potential income through interest payments. The Money Market Fund may add stability to the Portfolio by investing in cash equivalents, like U.S. Treasury bills, certificates of deposit and money market instruments. Also included in the Portfolio are smaller positions in TIPS, U.S. dollar-denominated bonds issued by governments and government-related issuers in emerging market countries, and investments in debt issued by the U.S. Treasury (not including inflation-protected bonds) and U.S. government agencies, as well as corporate or dollar-denominated foreign debt guaranteed by the U.S. government, with maturities greater than 10 years.

Risks:

The Portfolio primarily may be subject to the following risks:

- The Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk, and Extension Risk due to its investments in bond Funds. The Portfolio also has a moderate level of Income Fluctuation Risk, low to moderate levels of Country/Regional Risk, Currency Hedging Risk, Non-diversification Risk, and low levels of Manager Risk, Index Sampling Risk and Derivatives Risk.

Income & Growth Portfolio

Objective:

The Income and Growth Portfolio seeks to conservatively grow the Portfolio with modest income at higher risk. The Portfolio is designed for investors with a moderate tolerance for short-term market fluctuations who expect moderate capital appreciation and have a modest desire for income. The Portfolio investments include exposure to a mix of bonds with a blend of globally diversified equity securities.

Strategy:

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, Fidelity® U.S. Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Vanguard Long-Term Treasury Index Fund Institutional Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Government Bond Index Fund Institutional Shares and Vanguard Federal Money Market Fund, resulting in an allocation of 40% of its assets to stocks, 59% to fixed income assets and 1% to the Money Market Fund.

The Portfolio's Underlying Funds primarily include a wide spectrum of public, investment-grade, taxable, fixed income securities issued in the U.S. to provide potential income through interest payments. The short-term Money Market Fund may add stability to the Portfolio by investing in cash equivalents, like U.S. Treasury bills, certificates of deposit and money market instruments. Also included in the Portfolio are smaller positions in TIPS, U.S. dollar-denominated bonds issued by governments and government-related issuers in emerging market countries, and investments in debt issued by the U.S. Treasury (not including inflation-protected bonds) and U.S. government agencies, as well as corporate or dollar-denominated foreign debt guaranteed by the U.S. government, with maturities greater than 10 years.

The stock investments in the Portfolio consist of indirect investments mostly in large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

Risks:

The Portfolio primarily may be subject to the following risks:

- Because it invests mainly in bond Funds, the Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk and Extension Risk. Through its stock Fund holdings, the Portfolio has a low to moderate level of Stock Market Risk.
- The Portfolio also has low to moderate levels of Country/Regional Risk, Currency Risk, Emerging Markets Risk, Currency Hedging Risk, Non-diversification Risk, Index Sampling Risk and Derivatives Risk.

Balanced Portfolio

Objective:

The Balanced Portfolio seeks to provide a balanced mix of steady return and growth but comes with additional risk. The Portfolio is designed for investors with a modest tolerance for short-term market fluctuations and a desire for income and moderate capital appreciation. The Portfolio investments include a balanced mix of bonds and globally diversified equity securities.

Strategy:

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, Fidelity® U.S. Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Vanguard Long-Term Treasury Index Fund Institutional Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Government Bond Index Fund Institutional Shares and Vanguard Federal Money Market Fund, resulting in an allocation of 50% of its assets in stocks, 49% in fixed income assets and 1% in the Money Market Fund.

The Portfolio's Underlying Funds primarily include a wide spectrum of public, investment-grade, taxable, fixed income securities issued in the U.S. to provide potential income through interest payments. The Money Market Fund may add stability to the Portfolio by investing in cash equivalents, like U.S. Treasury bills, certificates of deposit and money market instruments. Also included in the Portfolio are smaller positions in TIPS, U.S. dollar-denominated bonds issued by governments and government-related issuers in emerging market countries, and investments in debt issued by the U.S. Treasury (not including inflation-protected bonds) and U.S. government agencies, as well as corporate or dollar-denominated foreign debt guaranteed by the U.S. government, with maturities greater than 10 years.

The stock investments in the Portfolio consist of indirect investments in mostly large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

Risks:

The Portfolio primarily may be subject to the following risks:

- Because half of the Portfolio is invested in bond Funds, the Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk, and Extension Risk. Through its stock Fund holdings, the Portfolio has moderate level of Stock Market Risk.
- The Portfolio also has low to moderate levels of Country/Regional Risk, Currency Risk, Emerging Markets Risk, Currency Hedging Risk, Non-diversification Risk, Index Sampling Risk and Derivatives Risk.

Conservative Growth Portfolio

Objective:

The Conservative Growth Portfolio seeks to grow the Portfolio moderately with low income but comes with increasing degree of risk. The Portfolio is designed for investors with a moderately high tolerance for short-term market fluctuations who expect significant capital appreciation and have a minimal desire for current income. The Portfolio investments include a blend of globally diversified equity securities with exposure to a mix of bonds.

Strategy:

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, Fidelity® U.S. Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Vanguard Long-Term Treasury Index Fund Institutional Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Government Bond Index Fund Institutional Shares and Vanguard Federal Money Market Fund, resulting in an allocation of 60% of its assets in stocks, 39% in fixed income assets and 1% in the Money Market Fund.

The stock investments in the Portfolio consist of indirect investments mostly in large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

Risks:

The Portfolio primarily may be subject to the following risks:

- Because it invests in stock Funds, the Portfolio is subject to Stock Market Risk. The Portfolio is also subject to high levels of Country/Regional Risk, Currency Risk, and Emerging Markets Risk. The Portfolio also has low levels of Investment Style Risk, Index Sampling Risk and Derivatives Risk.
- Because it invests in bond Funds, the Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk, and Extension Risk. The Portfolio also has low to moderate levels of Country/Regional Risk, Currency Risk, Emerging Markets Risk, Currency Hedging Risk, Non-Diversification Risk, Index Sampling Risk and Derivatives Risk.

Moderate Growth Portfolio

Objective:

The Moderate Growth Portfolio seeks capital appreciation but comes with high degree of risk. The Portfolio is designed for investors with a high tolerance for short-term equity market fluctuations who expect capital appreciation and have low desire for income. The Portfolio investments are generally a blend of globally diversified equity securities.

Strategy:

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund, Fidelity® U.S. Bond Index Fund, Vanguard Total Bond Market Index Fund Institutional Plus Shares, Vanguard Long-Term Treasury Index Fund Institutional Shares, Schwab® Treasury Inflation Protected Securities Index Fund, Vanguard Emerging Markets Government Bond Index Fund Institutional Shares and Vanguard Federal Money Market Fund, resulting in an allocation of 80% of its assets in stocks and approximately 20% in fixed income assets.

The stock investments in the Portfolio consist of indirect investments mostly in large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

Risks:

The Portfolio primarily may be subject to the following risks:

- Because it invests mostly in stock Funds, the Portfolio is primarily subject to high levels of Stock Market Risk. The Portfolio is also subject to high levels of Country/Regional Risk, Currency Risk, and Emerging Markets Risk. The Portfolio also has low levels of Investment Style Risk, Index Sampling Risk, and Derivatives Risk.
- Because it invests in bond Funds, the Portfolio is primarily subject to low to moderate levels of Interest Rate Risk, Credit Risk, Income Risk, Call Risk, Prepayment Risk, and Extension Risk. The Portfolio also has low to moderate levels of Country/Regional Risk, Currency Risk, Emerging Markets Risk, Currency Hedging Risk, Non-Diversification Risk, Index Sampling Risk and Derivatives Risk.

Growth Portfolio

Objective:

The Growth Portfolio seeks to maximize growth but comes with the highest degree of risk. The Portfolio is designed for investors with a very high tolerance for short-term equity market fluctuations who expect maximum capital appreciation and have no desire for income. The Portfolio investments are generally a blend of globally diversified equity securities.

Strategy:

The Portfolio currently invests in the following Funds: Fidelity® Total Market Index Fund, Schwab Total Stock Market Index Fund®, Fidelity® International Index Fund, Fidelity® Emerging Markets Index Fund and Vanguard Federal Money Market Fund, resulting in an allocation of 99% of its assets in stocks and 1% in the Money Market Fund.

The stock investments in the Portfolio consist of indirect investments in mostly large-capitalization U.S. stocks and, to a lesser extent, mid-, small-, and micro-capitalization U.S. stocks; and international stocks.

Risks:

The portfolio primarily may be subject to the following risks:

- Because it invests nearly all assets in stock Funds, the Portfolio is primarily subject to high levels of Stock Market Risk. The Portfolio is also subject to high levels of Country/Regional Risk, Currency Risk, and Emerging Markets Risk. The Portfolio also has low levels of Investment Style Risk, Index Sampling Risk, and Derivatives Risk.

Static Portfolio Fee Structure Tables

The following table shows total Fees charged to each Static Portfolio in DreamAhead. The Underlying Fund Fee, Service Fee and State Administrative Fee added together equal the Total Annual Asset-Based Fee.

Static Portfolios

Portfolio Name	Annualized Asset-Based Fees				Additional Expenses	
	Estimated Underlying Fund Fee ¹	Service Fee ²	State Administrative Fee ³	Total Annual Asset-Based Fee ⁴	Annual Account Maintenance Fee ⁵	
Stocks						
Growth Portfolio		0.034%	0.12%	0.10%	0.254%	\$30
Moderate Growth Portfolio		0.053%	0.12%	0.10%	0.273%	\$30
Conservative Growth Portfolio		0.052%	0.12%	0.10%	0.272%	\$30
Balanced Portfolio		0.052%	0.12%	0.10%	0.272%	\$30
Income & Growth Portfolio		0.052%	0.12%	0.10%	0.272%	\$30
Income Portfolio		0.070%	0.12%	0.10%	0.290%	\$30
Cash Preservation Portfolio		0.110%	0.12%	0.10%	0.330%	\$30

¹ Estimated Underlying Fund Fees reflect each Underlying Fund's expense ratio disclosed in its most recent prospectus that was available as of July 28, 2021. Portfolios other than the Growth Portfolio and the Cash Preservation Portfolio also include a purchase fee of 0.75% on the Vanguard Emerging Markets Government Bond Index Fund component of each Portfolio. Because this purchase fee is charged only upon the initial purchase of the Fund, the actual Underlying Fund Fees paid may be less than that shown. Expenses for multiple-fund Portfolios represent a weighted average of the expenses of the Portfolio's Underlying Funds. The fees and expenses of the Underlying Funds may change.

^{2,5} Sundry Administration, LLC receives the Service Fee and \$25 of the Annual Account Maintenance Fee for the Program Management Services it provides to DreamAhead.

^{3,5} The Committee receives the State Administrative Fee and \$5 of the Annual Account Maintenance Fee to help cover the Committee's administrative costs and expense of operating DreamAhead.

⁴ This total is assessed against assets over the course of the year and includes the annualized Service Fee, the annualized Underlying Fund Fee, and the annualized State Administrative Fee, but does not include the Annual Account Maintenance Fee. Please refer to the table on the following page of the document that shows the total assumed investment cost over 1, 3, 5, and 10-year periods.

Approximate Cost for a \$10,000 Investment

The following table compares the approximate cost of investing in DreamAhead over different periods of time. These hypotheticals are not intended to predict or project investment performance. Past performance is no guarantee of future results. Your actual cost may be higher or lower. The tables are based on the following assumptions:

- A \$10,000 contribution is invested for the time periods shown.
- A 5% annually compounded rate of return on the amount invested throughout the period.
- The Account balance at the end of the period shown is used to pay for Qualified Expenses (the table does not consider the impact of any potential state or federal taxes on the cost of investing).
- The total annual asset-based fee remains the same for the Static Portfolios as that shown in the Static Portfolios Fee Structure Table. The actual total annual asset-based fee may be higher or lower.
- Each Account is charged the full Annual Account Maintenance Fee of \$30.
- For Portfolios other than the Growth Portfolio and the Cash Preservation Portfolio, a purchase fee of 0.75% is charged in Year 1 on the Vanguard Emerging Markets Government Bond Index Fund component of each Portfolio.

Static Portfolios

APPROXIMATE COST OF \$10,000 INVESTMENT

Portfolio Option	1 Year	3 Years	5 Years	10 Years
Growth Portfolio	\$56.18	\$172.15	\$293.34	\$622.62
Moderate Growth Portfolio	\$58.09	\$174.83	\$296.85	\$628.56
Conservative Growth Portfolio	\$58.03	\$174.64	\$296.52	\$627.81
Balanced Portfolio	\$57.99	\$174.51	\$296.29	\$627.31
Income & Growth Portfolio	\$57.99	\$174.52	\$296.32	\$627.37
Income Portfolio	\$59.86	\$180.38	\$306.51	\$650.12
Cash Preservation Portfolio	\$63.96	\$196.50	\$335.66	\$716.98

Underlying Funds

The following profiles highlight the investment objective, strategy, and a summary of the main risks of each of the Underlying Funds in which both the Year of Enrollment and the Static Portfolios invest. The Portfolios in DreamAhead are more likely to meet their goals if each Underlying Fund in which each Portfolio invests achieves its stated investment objectives.

The information provided in this Program Details Booklet and other information in the links below has been prepared by or on behalf of the applicable Underlying Fund by its Investment Manager and has been derived from the applicable Underlying Fund prospectuses. The Program Administrators assume no responsibility for its accuracy or completeness.

Fidelity Underlying Funds

Fidelity Total Market Index Fund

Ticker: FSKAX

Website: <https://fundresearch.fidelity.com/mutual-funds/summary/315911693>

Investment Objective

The Fund seeks to provide investment results that correspond to the total return of a broad range of United States stocks.

Principal Investment Strategies

- Normally investing at least 80% of assets in common stocks included in the Dow Jones U.S. Total Stock Market IndexSM, which represents the performance of a broad range of U.S. stocks.
- Using statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, and earnings growth to attempt to replicate the returns of the Dow Jones U.S. Total Stock Market IndexSM using a smaller number of securities.
- Lending securities to earn income for the Fund.

Principal Investment Risks

- Stock Market Volatility; Issuer-Specific Changes; Correlation to Index; and Passive Management Risk

Fidelity International Index Fund

Ticker: FSPSX

Website: <https://fundresearch.fidelity.com/mutual-funds/summary/315911727>

Investment Objective

The Fund seeks to provide investment results that correspond to the total return of foreign stock markets.

Principal Investment Strategies

- Normally investing at least 80% of assets in common stocks included in the MSCI EAFE Index, which represents the performance of foreign stock markets.
- Using statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, earnings growth, and country weightings to attempt to replicate the returns of the MSCI EAFE Index.
- Lending securities to earn income for the Fund.

Principal Investment Risks

- Stock Market Volatility; Foreign Exposure; Issuer-Specific Changes; Correlation to Index; and Passive Management Risk

Fidelity Emerging Markets Index Fund

Ticker: FPADX

Website: <https://fundresearch.fidelity.com/mutual-funds/summary/316146331>

Investment Objective

The Fund seeks to provide investment results that correspond to the total return of emerging stock markets.

Principal Investment Strategies

- Normally investing at least 80% of assets in securities included in the MSCI Emerging Markets Index and in depository receipts representing securities included in the index.
- Using statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, earnings growth, country weightings, and the effect of foreign taxes to attempt to replicate the returns of the MSCI Emerging Markets Index.
- Lending securities to earn income for the Fund.

Principal Investment Risks

- Stock Market Volatility; Foreign and Emerging Market Risk; Issuer-Specific Changes; Correlation to Index; and Passive Management Risk

Fidelity U.S. Bond Index Fund

Ticker: FXNAX

Website: <https://fundresearch.fidelity.com/mutual-funds/summary/316146356>

Investment Objective

The Fund seeks to provide investment results that correspond to the aggregate price and interest performance of the debt securities in the Bloomberg Barclays U.S. Aggregate Bond Index.

Principal Investment Strategies

- Normally investing at least 80% of the Fund's assets in bonds included in the Bloomberg Barclays U.S. Aggregate Bond Index.
- Using statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Bloomberg Barclays U.S. Aggregate Bond Index using a smaller number of securities.
- Engaging in transactions that have a leveraging effect on the Fund, including investments in derivatives - such as swaps (interest rate, total return, and credit default), options, and futures contracts - and forward-settling securities, to adjust the Fund's risk exposure.
- Investing in Fidelity's central funds (specialized investment vehicles used by Fidelity® funds to invest in particular security types or investment disciplines).

Principal Investment Risks

- Interest Rate Changes; Foreign Exposure; Prepayment; Issuer-Specific Changes; Correlation to Index; Passive Management Risk; and Leverage Risk

Vanguard Underlying Funds

Vanguard Emerging Markets Government Bond Index Fund – Institutional Shares

Ticker: VGIVX

Website: <https://investor.vanguard.com/mutual-funds/profile/VGIVX>

Investment Objective

The Fund seeks to track the performance of a benchmark index that measures the investment return of U.S. dollar-denominated bonds issued by governments and government-related issuers in emerging market countries.

Principal Investment Strategies

The Vanguard Emerging Markets Government Bond Index Fund employs an indexing investment approach designed to track the performance of the Bloomberg Barclays USD Emerging Markets Government RIC Capped Index. This index includes U.S. dollar-denominated bonds that have maturities longer than one year and that were issued by emerging market governments and government-related issuers. The index is capped, which means that its exposure to any particular bond issuer is limited to a maximum of 20% and its aggregate exposure to issuers that individually constitute 5% or more of the index is limited to 48%. If the index, as constituted based on market weights, exceeds the 20% or 48% limits, the excess is reallocated to bonds of other issuers represented in the index.

The Fund invests by sampling the index, meaning that it holds a range of securities that, in the aggregate, approximates the full index in terms of key risk factors and other characteristics. All of the Fund's investments will be selected through the sampling process, and under normal circumstances at least 80% of the Fund's assets will be invested in bonds included in the index. The Fund maintains a dollar-weighted average maturity consistent with that of the index, which generally ranges between 10 and 15 years and, as of October 31, 2017, was 10.1 years.

Principal Risks

- Country/regional risk; Emerging markets risk; Non-diversification risk; Credit risk; Liquidity risk; Interest rate risk; Income risk; Index sampling risk; Call risk; and Extension risk

A Note on Risk: Many investors invest in bonds and bond funds in an attempt to lower the overall risk of their portfolios. This strategy makes sense when the bonds owned are U.S. bonds because U.S. bond returns typically are not highly correlated with, and are far less volatile than, stock returns. The strategy is less likely to be effective, however, when the bonds owned are emerging market bonds. Returns of emerging market bonds, even dollar-denominated bonds like those owned by the Fund, can be quite volatile and tend to correlate more closely with U.S. and foreign stock returns than with U.S. bond returns. Consequently, if your goal is to lower risk and volatility, this Fund may not be an appropriate investment.

Vanguard Total Bond Market Index Fund – Institutional Plus Shares

Ticker: VBMPX

Website: <https://investor.vanguard.com/mutual-funds/profile/VBMPX>

Investment Objective

Vanguard Total Bond Market Index Fund seeks to track the performance of a broad, market-weighted bond index.

Principal Investment Strategies

The Fund employs an indexing investment approach designed to track the performance of the Bloomberg Barclays U.S. Aggregate Float Adjusted Index. This index represents a wide spectrum of public, investment-grade, taxable, fixed income securities in the United States—including government, corporate, and international dollar-denominated bonds, as well as mortgage-backed and asset-backed securities—all with maturities of more than 1 year.

The Fund invests by sampling the index, meaning that it holds a broadly diversified collection of securities that, in the aggregate, approximates the full index in terms of key risk factors and other characteristics. All of the Fund's investments will be selected through the sampling process, and at least 80% of the Fund's assets will be invested in bonds held in the index. The Fund maintains a dollar-weighted average maturity consistent with that of the index, which generally ranges between 5 and 10 years and, as of December 31, 2016, was 8.3 years.

Principal Risks

- Interest rate risk; Income risk; Prepayment risk; Extension risk; Call risk; Credit risk; Index sampling risk; and Liquidity risk

Vanguard Long-Term Treasury Index Fund – Institutional Shares

Ticker: VLGIX

Website: <https://investor.vanguard.com/mutual-funds/profile/VLGIX>

Investment Objective

Vanguard Long-Term Treasury Index Fund seeks to track the performance of a market-weighted Treasury index with a long-term dollar-weighted average maturity.

Principal Investment Strategies

The Fund employs an indexing investment approach designed to track the performance of the Bloomberg Barclays US Long Treasury Bond Index. This index includes fixed income securities issued by the U.S. Treasury (not including inflation-protected bonds), with maturities greater than 10 years.

The Fund invests by sampling the index, meaning that it holds a range of securities that, in the aggregate, approximates the full index in terms of key risk factors and other characteristics. All of the Fund's investments will be selected through the sampling process, and under normal circumstances, at least 80% of the Fund's assets will be invested in bonds included in the index. The Fund maintains a dollar-weighted average maturity consistent with that of the index, which was 24.8 years as of August 31, 2017.

Principal Risks

- Interest rate risk; Income risk; Credit risk; and Index sampling risk

Vanguard Federal Money Market Fund

Ticker: VMFXX

Website: <https://investor.vanguard.com/mutual-funds/profile/VMFXX>

Investment Objective

The Fund seeks to provide current income while maintaining liquidity and a stable share price of \$1.

Principal Investment Strategies

The Fund invests primarily in high-quality, short-term money market instruments. Under normal circumstances, at least 80% of the Fund's assets are invested in securities issued by the U.S. government and its agencies and instrumentalities. Although these securities are high quality, some of the securities held by the Fund are neither guaranteed by the U.S. Treasury nor supported by the full faith and credit of the U.S. government. To be considered high quality, a security must be determined by Vanguard to present minimal credit risk based in part on a consideration of maturity, portfolio diversification, portfolio liquidity, and credit quality. The Fund maintains a dollar-weighted average maturity of 60 days or less and a dollar-weighted average life of 120 days or less.

Government money market funds are required to invest at least 99.5% of their total assets in cash, U.S. government securities, and/or repurchase agreements that are collateralized solely by U.S. government securities or cash (collectively, government securities). The Fund generally invests 100% of its assets in government securities and therefore will satisfy the 99.5% requirement for designation as a government money market fund.

Principal Risks

- Income risk; Manager risk; and Credit risk

Schwab Underlying Funds

Schwab Total Stock Market Index Fund

Ticker: SWTSX

Website: https://www.schwabfunds.com/public/csim/home/products/mutual_funds/summary.html?symbol=SWTSX

Investment Objective

The Fund's goal is to track the total return of the entire U.S. stock market, as measured by the Dow Jones U.S. Total Stock Market IndexSM.

Principal Investment Strategies

To pursue its goal, the Fund generally invests in stocks that are included in the Dow Jones U.S. Total Stock Market Index. It is the Fund's policy that under normal circumstances it will invest at least 80% of its net assets (including, for this purpose, any borrowings for investment purposes) in these stocks; typically, the actual percentage is considerably higher. The Fund will notify its shareholders at least 60 days before changing this policy.

The Fund generally gives the same weight to a given stock as the index does. However, when the investment adviser believes it is in the best interest of the Fund, such as to avoid purchasing odd-lots (i.e., purchasing less than the usual number of shares traded for a security), for tax considerations, or to address liquidity considerations with respect to a stock, the investment adviser may cause the Fund's weighting of a stock to be more or less than the index's weighting of the stock. The Fund may sell securities that are represented in the index in anticipation of their removal from the index or buy securities that are not yet represented in the index in anticipation of their addition to the index.

The Dow Jones U.S. Total Stock Market Index includes all publicly traded stocks of companies headquartered in the United States for which pricing information is readily available – 3,767 stocks as of December 31, 2017. The index is a float-adjusted market capitalization weighted index that reflects the shares of securities actually available to investors in the marketplace.

Because it may not be possible or practical to purchase all of the stocks included in the index, the investment adviser seeks to track the total return of the index by using sampling techniques. These techniques involve investing in a limited number of index securities which, when taken together, are expected to perform similarly to the index as a whole. These techniques are based on a variety of factors, including capitalization, performance attributes, dividend yield, price/earnings ratio, risk factors, industry factors and other characteristics. The Fund generally expects that its portfolio will include the largest 2,000 to 2,800 U.S. stocks (measured by the float-adjusted market capitalization), and that its industry weightings, dividend yield and price/earnings ratio will be similar to those of the index.

Principal Risks

- Market Risk; Equity Risk; Investment Style Risk; Tracking Error Risk; Sampling Index Tracking Risk; Concentration Risk; Market Capitalization Risk; Large-Cap Company Risk; Mid-Cap Company Risk; Small-Cap Company Risk; Derivatives Risk; Liquidity Risk; and Securities Lending Risk

Schwab Treasury Inflation Protected Securities Index Fund

Ticker: SWRSX

Website: https://www.schwabfunds.com/public/csim/home/products/mutual_funds/summary.html?symbol=SWRSX

Investment Objective

The Fund's goal is to track as closely as possible, before fees and expenses, the price and yield performance of the Bloomberg Barclays U.S. Treasury Inflation Protected Securities (TIPS) Index (Series-L)SM. The Fund's investment objective is not fundamental and therefore may be changed by the Fund's board of trustees without shareholder approval.

Principal Investment Strategies

To pursue its goal, the Fund generally invests in securities that are included in the index. The index includes all publicly-issued TIPS that have at least one year remaining to maturity, are rated investment

grade and have \$250 million or more of outstanding face value. The TIPS in the index must be denominated in U.S. dollars and must be fixed-rate and non-convertible.

It is the Fund's policy that, under normal circumstances, it will invest at least 90% of its net assets (net assets plus borrowings for investment purposes) in securities included in the index.

Principal Risks

- Market Risk; Investment Style Risk; Inflation Protected Security Risk; Interest Rate Risk; Credit Risk; Liquidity Risk; Prepayment and Extension Risk; Sampling Index Tracking Risk; Tracking Error Risk; and Money Market Fund Risk
